

# United Electric Cooperative

Maryville and Savannah, Missouri

Members of United Electric Cooperative can purchase “Green Power”. Green power is electricity generated from renewable sources including wind turbines and the burning of renewable fuels like agriculture crop residue, switch grass or even walnut hulls.

Electricity from renewable sources is more expensive to generate than power from coal-fired power plants, the predominate source of electricity for Missouri’s electric cooperatives. Members who choose to buy blocks of renewable energy to supplement their regular energy needs will pay ***\$4.00 per block of 100 kwh’s in addition to their existing rate.*** The blocks of 100 kilowatts are sold on an annual basis and members who wish to purchase them must sign a 12-month minimum contract. Only those members who contract to buy renewable energy will be charged more.

If you are interested in purchasing Green Power, please fill out the coupon below and send it to the office. If you have questions, please call the office at 1-800-748-1488.

## Green Power Enrollment Agreement

I would like to enroll in the Green Power program. I agree to pay \$4.00 per month in addition to my normal cost of energy for each 100 kilowatt hour block of Green Power that I request. I understand that the commitment period is a minimum of 12 months. I understand that the Green Power is available on a quarterly enrollment and that I will be included in the next available enrollment period.

- I wish to purchase (1) 100-kilowatt hour block of Green Power each month for a minimum of 12 months.
- I wish to purchase multiple blocks of Green Power each month for a minimum of 12 months.
- 2 blocks (\$8/month)     3 blocks (\$12/month)     Other: \_\_\_ blocks
